

New Delsys facility in Tokyo, Japan

Delsys Inc. is proud to announce its plans to expand operations in Japan. This is in response to a strong and growing demand for Delsys technology from new and existing customers. With local representation within Japan, we will improve customer support and foster strong relationships with local distributors.

Delsys Japan aims to provide the next generation technology to researchers and clinicians exploring motor control science. With research-based evidence supporting its technology for more than 20 years, Delsys continues to advance the capabilities of wearable sensors that yield quality data of the highest order. We invite you to push the boundaries of science with Delsys technology.

Asian Symposium on Motor Control in Biomechanics

In Honor of Prof. T. Kiryu's retirement from rich academic career at Niigata University

The De Luca Foundation, a charitable organization founded by former Delsys president Prof. Carlo J. De Luca, is pleased to announce its first Asian Symposium on Motor Control in Biomechanics. The symposium will honor Prof. Tohru Kiryu's retirement from a rich academic career at Niigata University.

The invited speakers will be established investigators in the fields of Motor Control and Biomechanics, from institutions in Japan and the United States, and will present their perspective and research at the intersection of these two fields. Each invited speaker is asked to present for 40 minutes, plus include a 5 minute Q & A session.

Date
April 20, 2018

Time
10am to 4pm

Location
Tokyo Institute of Technology
